

Yard Scale

Multi-Camera Surveillance Monitor

Users: Security Personnel

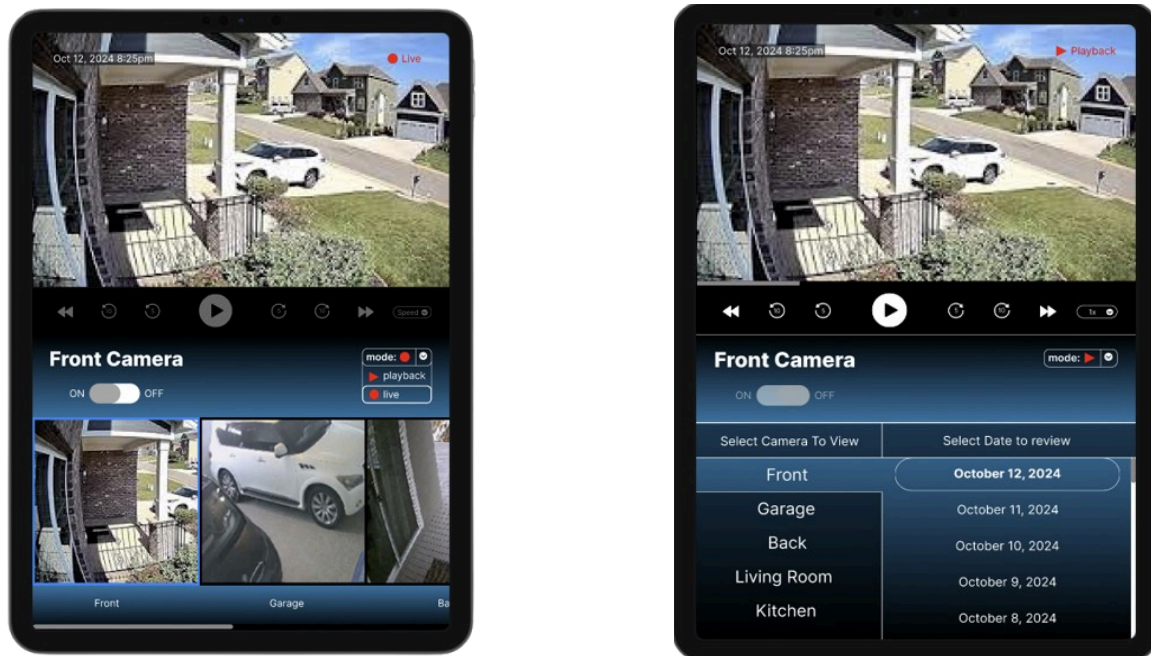

Task: During business hours, a security officer monitors multiple camera feeds from the front entrance, hallways, and staircases to quickly identify and respond to any suspicious activity or safety concerns.

The interface displays:

- 8 feeds from eight cameras.
 - Each camera feed has a red indicator that signifies its live state.
 - Each feed is laid out in a grid to ensure efficient use of screen space, allowing simultaneous monitoring of multiple areas.
 - Each camera feed can be selected to be displayed at the bottom center for review. This feed has the following features:
 - Playback controls (pause, play, fast forward, rewind) to review past footage and date selector to review specific date..
 - Timestamp display at the top right corner.

Foot Scale

Home Security Surveillance App

Users: Homeowners

Task: While at work, Jamie receives an alert on their tablet about unusual activity detected near their front door. They want to quickly check the security camera to ensure everything is okay.

The interface displays:

- A primary camera feed (set when tapping the different camera options at the bottom). This larger view enables focused monitoring of specific areas.
 - Displays a timestamp (top left corner) of the footage.
 - Shows the mode of the feed (live or playback at the top right corner)
- Playback controls (disabled if live) such as play, forward, rewind, etc.
- Primary camera feed label
- A toggle switch to remotely turn on/off the selected camera
- A mode selector:
 - Playback
 - Playback controls are enabled
 - Shows tabs for which camera you want to review
 - Shows dates that you can select to review specific footage
 - Live
 - Playback controls are disabled
 - Shows a carousel for the different cameras that you can select to set it as the primary camera feed.

Inch Scale

Home Security Door App

User: Homeowners

Task: Alex is heading out but realizes they may have forgotten to lock the back door. They want a quick way to check and secure the door from their watch."

The interface displays:

- Door labels (front, back, garage) to clearly indicate which door the user is controlling.
- Toggle switch for each door label to switch between lock/unlock (open/close for garage) .
